ameur ,Borj Louzir,Ariana, Tunis

PROFESSIONAL SUMMARY

Engineering student passionate about software development, embedded systems, IoT, fintech platforms, and web technologies. I combine diverse technical skills in programming, electronics, application development, and project management. Active in student organizations with solid hands-on experience from academic and professional projects.

EDUCATION

Mathematics Baccalaureate	2022
Engineering Cycle Student, ESPRIT	2023 – Present
IntegratedPreparatoryCycle–1stYearEngineering Cycle	

PROFESSIONAL EXPERIENCE

Seller – LC Waikiki	2025 – Present
- Assisted customers and provided product recommendations. - Managed product organization and stock presentation in store. - Developed communication, teamwork, and sales skills.	
Freelance Graphic Designer	2023 – Present
- Designed logos, posters, banners, and social media visuals. - Created UI/UX prototypes for mobile and web interfaces. - Delivered branding kits and visual identities using Adobe Illustrator and Photoshop. - Edited promotional videos and motion content on Adobe Premiere Pro.	
Intern – Web Developer (ETAP)	July 2024
- Developed a web application for employee management (attendance, leave requests). - Technologies: HTML, CSS, JS, PHP, MVC.	

ACADEMIC & TECHNICAL PROJECTS

FinTrack – Fintech Platform
- Fintech platform developed using JavaFX for desktop application and Symfony for web application. - Implemented user management, authentication, transactions, and financial tracking. Technologies: Java, JavaFX, Symfony, MySQL.
InnoVest – Web App then Mobile
- University project: platform connecting investors and entrepreneurs. Technologies: HTML, CSS, JS, PHP, MVC, FlutterFlow.
SmartFix Desktop App
- Maintenance management desktop app with advanced UI and Arduino integration. Technologies: C++, QT Creator, Arduino Uno.

Smart Greenhouse

- Automatic greenhouse with temperature/humidity monitoring and ventilation control.
- **Technologies:** PIC16F877, Proteus ISIS, MikroC, MPLAB.

Network Project

- Complete multi-router topology with VLSM and static/dynamic routing.
- **Technologies:** GNS3, Unix.

”TMUZYA” Game

- 2D game developed in my first year showcasing Tunisian culture.
- **Technologies:** C, SDL.

COMMUNITY INVOLVEMENT

IEEE ISSAT Mateur Student Branch

- Active Member
- Vice-Chair – IAS Chapter

Certifications: Innovation Camp – Injaz, STM32 Initiation, UI/UX Design – 9antra.

SKILLS

Software Development: C, C#, C++, Java, JavaFX, Symfony, SDL, QT CREATOR, PHP (PDO /MVC), HTML, CSS, JavaScript, FlutterFlow.

Sales & Communication Skills: Customer service, Sales, Teamwork, Communication.

Adobe & Creative Tools: Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro.

Embedded Systems / IoT: Arduino, ESP32, STM32 (initiation), MikroC, PIC16F877, Proteus ISIS.

Languages: Arabic, French, English.
